Columbia University: Arts & Sciences
A&S Fall 2022 Standard Evaluation

Course: EEEBGR5010_001_2022_3 - STAT MODELING-ECOL & EVOL BIOL: EEEBG5010_001_2022_3_149794

Instructor: Maria Uriarte

TA: Rachel Cohen *

Response Rate: 14/19 (73.68 %)

1 - What are the strengths and weaknesses of Rachel Cohen (discussion section leader, lab section leader, grader) as an instructor, and how might Rachel Cohen's teaching be improved?

Response Rate	8/19 (42.11%)

- Rachel was awesome! Her office hours were so helpful for completing the labs and thinking about methods for the final project.
- I was so grateful that Rachel was our TA this semester. She was very patient in helping us understanding concepts and troubleshooting issues with us to make sure we understood our errors. She does a great job of meeting students where they are at and guiding them to bridge knowledge gaps. I am sure it would be more helpful if I gave constructive feedback, but I don't have any. 10/10
- Rachel is an outstanding TA. She is very clear in her communication and has a great grasp on the material. Her office hours were always so helpful. One improvement could be to provide reference material / preliminary discussion in the beginning of the lab session to be more efficient with addressing common issues that arise for many students (rather than just doing 1-1 to trouble shoot)
- Rachel was a phenomenal TA! She was incredibly helpful in lab and in her office hours. I think a lot of us would have struggled a lot more without her help. Her feedback on assignments was very helpful-- I really appreciate her taking the time to do that. I think she also did a great job structuring her office hours.
- Excellent
- Rachel Cohen was a fantastic teaching assistant and incredibly helpful during the lab sections and her office hours.
- Rachel was an excellent TA. Very helpful, patient, and available during labs, office hours, and by email. She is obviously incredibly skilled at R and statistical analysis but can also break down the concepts into a more interpretable way. Her feedback on labs was easily interpretable and she also included positive feedback, which is always nice! There were a few instances were she did not answer a question I had in lab correctly, but that was likely more due to the fact that she did not have the grading rubric available at the time.
- Rachel was a great TA with a lot of dedication to the course and to helping the students. She was always very helpful during labs and outside of class.

2 - What is the overall teaching effectiveness of Rachel Cohen?

Response Option	Weight	Frequency	Percent	Percent Responses	Means
